Davis-Standard Hosts SPE Technical Seminar

(Pawcatuck, Conn.)--Davis-Standard, LLC recently hosted a technical seminar for 24 members of the Connecticut, Southeastern New England, and Pioneer Valley, Massachusetts sections of the Society of Plastics Engineers. The evening seminar and plant tour took place at the Davis-Standard headquarters in Pawcatuck, Connecticut.

The seminar was part of SPE's on-going educational program for its members. John Plante, Davis-Standard Product Manager-Fiber, lectured on the main topic of the seminar, extruder manufacturing. Managers from various departments led tours for SPE members to allow them to see first-hand the extruder assembly process on the manufacturing floor. There was a question and answer session following the presentation and tour.

SPE meets monthly to discuss new trends and innovations in the plastics industry. For more information on the Society of Plastics Engineers, visit their website at www.4spe.org. For more information on Davis-Standard extrusion systems, visit www.davis-standard.com.
